SHREE BALAJI AGRO INDUSTRIES

Your Agriculture Solution

AN ISO 9001:2015 CERTIFIED COMPANY

Shree Balaji Agro Industries was established in 2014 in Dhule District of Maharashtra.

Agriculture is the backbone of our country, and the farmers are the true foundation of the nation's progress. In today's changing agricultural landscape, farmers face numerous challenges such as climate change, declining soil fertility, increasing pest and disease outbreaks, and the rising need for higher yields.

Considering all these challenges, the primary objective of **Shree Balaji Agro Industries** is to provide reliable and effective agricultural solutions to farmers. Keeping the needs of modern farming in mind, **Shree Balaji Agro Industries** develops and provides a variety of high-quality agricultural products. Our product range includes **crop protection products, plant growth promoters, bio-stimulants, soil conditioners, and various agri-inputs** that support crop growth and health.

Our products are formulated considering the practical on-field needs of farmers. These products are useful for strengthening root growth, increasing nutrient absorption, ensuring vigorous crop growth, and promoting flowering and fruiting. Consequently, they maintain crop health and help increase overall production.

These products are suitable for **Cotton, Soyabean, Turmeric, Sugarcane, Corn, Vegetables, Fruit crops, Cereals, Pulses, and Various other crops.**

When used at the right time and in recommended quantities, they help to achieve balanced crop growth and improve both the quality and quantity of the yield. This catalogue provides detailed information about our various agricultural products, their benefits, application methods, and recommended dosages. We are confident that this information will serve as a helpful guide for farmers and dealers in selecting the right products.

PRODUCTS

Jaguar

Jaguar is a potent, broad-spectrum botanical bio-pesticide formulated with garlic oil and a proprietary blend of medicinal plant extracts. It offers exceptional preventative and curative control against devastating agricultural pests and diseases, including fungi, viruses, thrips, nematodes, and various caterpillar species. Beyond pest control, it promotes fruit development and prevents premature flower or fruit drop while strengthening the natural defense mechanism of the plant. The recommended application dosage is 30 ml per 15 liters of water. For commercial import and distribution, it is available in 1 Liter, 500 ml, 250 ml, 100 ml, 50 ml, and 30 ml packaging.

Double Flower

Double Flower is an advanced agricultural biostimulant composed of a highly concentrated blend of Folic Acid, Amino Acids, and essential plant vitamins. It acts as a powerful catalyst for vegetative and reproductive growth, significantly maximizing the formation of secondary branches, flower buds, and fruits while completely arresting flower and fruit drop. This results in a substantial boost in produce quality, uniformity, and total harvest weight. The recommended application dosage is 15 ml per 15 liters of water. For global supply chains, it is available in 500 ml, 250 ml, 100 ml, 50 ml, and 30 ml commercial bottles.

Sumo Fighter

Sumo Fighter is a next-generation botanical bio-pesticide formulated with premium Pongamia oil (Karanj oil) and synergistic plant extracts. It is highly effective for the target management of stubborn sucking pests, thrips, caterpillars, and red spider mites. This eco-friendly formulation keeps crops pest-free, reduces crop stress, and builds long-term systemic resistance without creating pest immunity. The recommended application dosage is 30 ml per 15 liters of water, and it is packaged for global agricultural markets in 1 Liter, 500 ml, 250 ml, 100 ml, 50 ml, and 30 ml sizes.

Jaadu

Jaadu is an ultra-concentrated, premium biostimulant enriched with high-density Folic Acid, vital Amino Acids, and a complex of essential vitamins. It is scientifically designed to trigger vigorous plant growth, accelerate the formation of new branches, and promote uniform flowering and fruit setting. It prevents premature flower bud drop and drastically improves the sugar content, brix value, and aesthetic quality of the final produce, leading to highly profitable yields. The application dosage is 5 ml per 15 liters of water, and it is supplied in compact 100 ml, 50 ml, 30 ml, and 10 ml retail packs.

Killer

Killer is an advanced bio-pesticide processed using modern extraction technologies, containing holy basil (Tulsi) oil and a complex of organic botanical extracts. It provides rapid, highly effective systemic and contact control over all types of leaf-surface and internal stem-boring caterpillars. It completely disrupts the insect life cycle while simultaneously boosting the crop's internal immunity and overall yield quality. The recommended application dosage is 20 ml per 15 liters of water. It is available for international procurement in versatile packaging sizes including 1 Liter, 500 ml, 250 ml, 100 ml, 50 ml, and 30 ml bottles.

Amino Star

Amino Star is an advanced organic biostimulant derived from a rich soy-protein base combined with highly active plant autotonics. It provides crops with readily available structural amino acids, optimizing protein synthesis, boosting metabolic pathways, and maximizing yield performance. It is exceptionally effective at reducing environmental stress and preventing flower and fruit abortion under adverse conditions. The recommended application dosage is 30 ml per 15 liters of water, and it is available for international distribution in 1 Liter, 500 ml, 250 ml, and 100 ml packaging.

PRODUCTS

Opener

Opener is a premium, cutting-edge plant biostimulant formulated with high-grade Humic Acid and Fulvic Acid solutions. It is engineered to stimulate aggressive white root development, drastically increasing the root surface area for maximized nutrient absorption and crop yield potential. Additionally, it bolsters systemic plant immunity against soil-borne fungal pathogens, enhancing overall crop vigor. The standard application rate is 30 ml per 15 liters of water. For global distribution and commercial retail networks, Opener is packaged in standard 1 Liter, 500 ml, and 250 ml high-density bottles.

Bio Ween

Bio Ween is an advanced agricultural formulation derived from premium marine seaweed (*Ascophyllum nodosum*). This premium product is specifically engineered to accelerate photosynthesis, which significantly enhances overall plant growth, vitality, and stress tolerance. In addition to boosting crop resilience against environmental stress, it keeps crops robust, healthy, and high-yielding. The recommended application dosage is 30 ml per 15 liters of water to supply essential macronutrients and micronutrients to the crops. For commercial distribution and flexible retail needs, Bio Ween is available for export and bulk orders in versatile packaging sizes including 1 Liter, 500 ml, 250 ml, 100 ml, 50 ml, and 30 ml bottles.

Roots King

Roots King is a highly efficient agricultural supplement powered by premium Potassium Humate, Humic Acid, Fulvic Acid, and vital potassium compounds. This unique composition is developed to rapidly accelerate white root growth, improve nutrient uptake efficiency, and satisfy critical potassium demands of growing crops. It can be effortlessly blended with any conventional fertilizer or applied standalone to substantially increase crop yields. The recommended dosage is 1 kg per acre when mixed with fertilizers, or 15 grams per 15 liters of water for liquid application. To accommodate diverse international market segments, it is supplied in 1 kg, 500 g, 250 g, 100 g, 50 g, and 200 g commercial packaging options.

Zyme-G

Zyme-G is a next-generation granular soil conditioner enriched with essential structural minerals including Gypsum, Calcium, Sulfur, and Magnesium. It works by dramatically improving soil structure and porosity, maximizing water-retention capacity around the root zone, and increasing total water infiltration. By optimizing the soil profile and mineral availability, Zyme-G directly improves both the quality and overall yield of the harvest. The standard field application rate is 25 kg per acre, which can be adjusted depending on specific crop requirements. It is packaged and supplied in durable 25 kg commercial bags for secure international transport.

Black Diamond

Black Diamond is an advanced soil and crop vitalizer formulated from a proprietary blend of Humic Acid, Fulvic Acid, and essential vitamins. This product enhances the moisture-holding capacity around the root zone, optimizes soil aeration, and helps roots efficiently absorb fixed soil nutrients. It is fully compatible with all types of commercial fertilizers and significantly improves total fertilizer use efficiency (FUE). The recommended application rate is 4 kg per acre, adjusted based on crop specifications, and it is available for bulk distribution in robust 4 kg and 10 kg packaging.

Leaf-Stick

Leaf-Stick is a high-performance, silicone-based surfactant designed as a tank-mix adjuvant to maximize the efficacy of agricultural sprays. It drastically reduces surface tension, allowing agrochemicals to spread rapidly, adhere firmly to the leaf cuticle, and penetrate deeply into plant tissues without washing away. This maximizes the biological performance of active ingredients, ensures fast-acting results, and prevents chemical wastage by 10% to 20% while creating a protective layer over the foliage. The recommended dosage is a highly concentrated 5 ml per 15 liters of water, and it is available for global distribution in 250 ml, 100 ml, and 50 ml packaging.
